

PROMISES

I missed my chance,
To become the best you told me
to stay behind

What you can say
Won't reach my chest I've consumed
your usefulness

All the promises, promises you made
let me see a whole world to decay
promises, promises, gone

I mumble you just shout
You could have sort me out

You laughed at me
Played tricks on me
You bought my faith in you

You build smarter brains
Shape the faintest trait
You won't bring me down

All the promises, promises you made
let me see a whole world to decay
promises, promises, gone

All the promises, promises you made
let me see a whole world to decay
promises, promises, gone
